

Three-Day National Workshop
on
Content Management System using Joomla
April 8th to 10th, 2015

Information and Library Network Centre

(An Autonomous Inter-University Centre of UGC)

About INFLIBNET

Information and Library Network (INFLIBNET) is an autonomous Inter-University Centre of the University Grants Commission (UGC). The objectives of the Centre are to modernize libraries and information centres for information transfer and access, to support scholarship, learning and academic pursuit by establishing a national network of libraries and information centres in universities, institutions of higher learning and R & D institutions in India. Creation of national union database (IndCat), development of an integrated library management software (SOUL 2.0), human resource development, on-site training, providing bibliographic information services, extending technical help and guidance from time to time to academic libraries in automation and networking are some of the major activities of the Centre. The Centre provides access to e-resources to universities under the UGC-Infonet Digital Library Consortium. The Centre also provides access to 6500+ e-journals and 97,000+ e-books to the colleges in India through programme titled "National Library and Information Services Infrastructure for Scholarly Content (N-LIST)".

About Workshop

Joomla is one of the open source content management system available in the market. It is an award-winning content management system (CMS), which enables users to build library web sites, portals and blogs. Many aspects, including its ease to use interface and extensibility, have made Joomla the most popular web site building software available at zero cost. Best of all, Joomla is an open source CMS with backend in MYSQL and server side scripting in PHP. The INFLIBNET Centre is organising three day workshop on Content Management System using Joomla during April 08th-10th, 2015 at INFLIBNET Centre, Gandhinagar. The workshop includes lectures as well as extensive hands-on training which will provide both theoretical as well as practical exposure to the participants. The participants will get fair idea with ability to develop their own library website. The workshop will provide extensive training on installation, configuration, creation of menus and content as well as changing the themes. Moreover, the workshop will help participants in creating multi-lingual websites using Joomla.

Following topics will be covered in the workshop

- Introduction to Content Management System;
- Joomla: fundamentals and features (Theory);
- Installation and configuration of web server (XAMPP/WAMP);
- Joomla installations and basic configurations (theory and practices);
- Basic configuration in php, css and html for template customization in Joomla;

- Introduction to control panel and different options available for Administrator;
- Creating Articles, Menus, Sub-Menus and Contents;
- Adding modules and plug-ins;
- User and Content Management;
- Managing Articles, layouts and themes;
- Advanced concepts – Multilingual website, Discussion Forum; and
- Website hosting & backup
